Full-Stack Web Developer

Hi! My name is Vladislav (I usually go by Mike or Lumen).

I'm an experienced Full-Stack Web Developer (React/Redux, Node, Express, Next.js, GraphQL, etc.), with a Master's degree in Computer Science. I have designed, developed, and launched multiple websites and web applications currently used by thousands of people (see my portfolio and CV for more information).

I think that Pitch looks absolutely amazing, I would love to contribute to this project, and I believe I would be a great fit for a position of full-stack (or frontend) web developer.

If you agree - please send me a message!
