SUMMARY

Full-stack web developer with 8+ years of experience, specializing in building interactive websites and applications using modern technologies (React, Next.js, Node, GraphQL, etc).

Designed, developed, and launched multiple websites and applications currently used by thousands of people, built online communities with thousands of members, built mailing lists and social media audiences with thousands of followers.

EDUCATION

2020 - 2021 University of Birmingham, Computer Science MSc (graduated with distinction).

2019 Machine Learning Bootcamp.

2014 Programming School.

SKILLS

Frontend	React, Redux, TypeScript, HTML, CSS, JS, Sass, Bootstrap, Foundation, jQuery.
Backend	Next.js, Node, Express, Python, Django, GraphQL, REST, MongoDB, Postgres.
Design	UI and UX design in Figma. Many tools for creating 2D and 3D digital graphics.
Tools	Git, Linux server, Docker, Bash, SQL, Nginx, AWS, Stripe, Sendgrid, Vercel.
Soft skills	Technical and creative writing, product management, internet marketing, SEO.
Other skills	Teaching people how to code, running workshops, game development.

EXPERIENCE

All the projects below have been entirely designed and developed by me, from idea to launch.

Writing Streak • writingstreak.io • built with React, Redux, Node, Next.js, Vercel, Stripe.
Writing and publishing platform that helps writers track their writing progress and habits.
5000+ users from growth by word of mouth. Most active users use it for 100s days in a row.

Nulis • nulis.io • built with React/Redux, Node, Express. Hosted on DigitalOcean.
Mind-mapping software that helps writers collect and organize their knowledge. 1500+ users.

Sketch Club • sketchclub.io • built with Next.js, React, Prisma, GraphQL, Apollo, Vercel, AWS.
My CS Master's project. Instagram-inspired web app that helps art students to regularly practice their drawing skills. See the detailed project report here. 1700+ Discord members.

Godot Assets • godotassets.io • built with Next.js, React, Prisma, Vercel, AWS, Stripe.
A marketplace where people can discover, publish, and sell assets for the Godot Engine.
2300+ YouTube subscribers. 1600+ people on the mailing list.

RPG Adventures • rpgadventures.io • built with Next.js (static), Mdx, Vercel, Stripe.
A platform for publishing adventures for table-top roleplaying games, also used to launch my adventure writing course. 300+ students are attending my creative writing workshops
